

# WIRELESS FOR MIXED-USE

**Name:** The Bellevue Collection, Bellevue, Washington  
**Owner:** Kemper Development Co.  
**Overview:** The Northwest's Premier Resort Shopping Destination. 42 floors of luxury condos, 29 floors of Class A office space, 700 luxury hotel rooms, 250 retail shops, 19 sit-down restaurants, interactive bowling lounge, 16-screen cinema, and over 10,000 free parking spaces.

**“Our tenants and guests have made it clear that they want reliable wireless services. With public safety coverage mandates and the growing demand for indoor wireless, we rely on TriPower to keep our properties in compliance and ahead of the technology curve.”**

**Fritz Walter, Director of Construction  
Kemper Development Co.**

Faced with a new local mandate to provide public safety coverage for a 42 floor high-profile development under construction in downtown Bellevue, Kemper Development Co. needed answers quickly.

TriPower was engaged to meet the important requirements for public-safety coverage with an eye towards making The Bellevue Collection a place that also met the wireless needs of the property's distinguished tenants and guests. With a requirement for scalability to grow when new buildings were constructed, TriPower designed and installed a distributed antenna system utilizing a common head-end facility connected via fiber across the entire Bellevue Collection campus.

What began as a requirement for public-safety coverage has evolved into a comprehensive wireless coverage solution that sets The Bellevue Collection apart.
