

BUILDING A WIRELESS WORLD

TriPower is a leading Wireless Coverage Provider focused on planning, designing, installing and managing in-building coverage solutions that integrate the latest available technology. Whether our customers need us to meet a public safety coverage requirement, enhance existing coverage, or design an enterprise-wide neutral-host Distributed Antenna System (DAS), we have a portfolio of hundreds of successful deployments to draw from.

TriPower solves wireless coverage and convergence problems for a growing list some of the world's most recognized wireless carriers and property owners. Through industry education, a commitment to innovation, and a focus on in-building wireless leadership, TriPower is Building a Wireless World™.

Wireless Master Planning:

- Executive Consulting
- Needs & Usage Assessment
- Stakeholder Coordination
- Definition of Required Infrastructure
- Technology Migration Planning
- Wireless Budget Development
- Wireless Master Plan Publication

System Design:

- Site Survey
- RF Propagation Mapping & Modeling
- Equipment Specification
- Bill of Materials Definition
- CAD-based System Design
- FCC-stamped Design
and Installation Drawings
- CAD-based As-built Documentation

System Installation:

- Project and Construction Management
- Carrier Signal-Source Installation
- Low-voltage Cabling and Coax Installation
- Antenna System Installation
- System Optimization, Testing,
and Certification
- WiFi Access Point Integration
- Public Safety Compliance and Coordination

Wireless Asset Management:

- Single Point of Contact for Owner's
Wireless Asset
- Promotion of Neutral-DAS to Carriers
- Lease, Licensing, and System
Access Negotiations
- Carrier Integration Engineering
- System Monitoring
- Warranty and Technical Support
- Wireless Asset Management Reporting
